

AUTOCAD 3D Electrical Training Curriculum

AutoCAD Electrical 2013 Fundamentals covers the indispensable core topics for working with the AutoCAD Electrical software. In this course, students learn how to use many of the powerful electrical drawing creation tools in the software.

Students create schematic drawings (ladder logic and point to point), panel drawings, and PLC-I/O circuits using automated commands for symbol insertion, component tagging, wire numbering, and drawing modification. In addition, students are introduced to methods of customizing AutoCAD Electrical software symbols, circuits, and databases. Other topics covered include title block linking, reporting tools, templates, and project files.

Prerequisite

Delegate should have the prior knowledge of AUTOCAD. The course is aimed at Electrical Engineers who have good understanding of the electrical design process.

Course Duration :- 80 Hrs
